

PG TECH PVT.LTD.

DEDICATED TO SCIENTIFIC COMMUNITY

ABOUT US

We are an internationally recognized manufacturing and merchandiser company located in central INDIA. We are representing world renowned brands dealing in Scientific and Analytical instruments.

In the process of diversification, company had established a technical division engaged in manufacturing and exporting Insulation Ancillary items. With an objective of contributing towards Energy Conservation a dedicated team is engaged with experienced members in the field of production and Insulation .

PG Tech Private limited (Insulation division) was started in the year 2017 and with sincere efforts and consistent quality are exporting all types of Insulation ancillary and had established its brand name as leading supplier within a span of 3 years.

PG Tech Pvt Ltd is committed to Customer satisfaction through effective team work and continual improvement. We have complete range of Insulation ancillary items to serve various industries viz, Petrochemical & Refineries ,Power Plants , Steel Plants, Oil and Gas , Fertilizers , Chemical Process plants , Pharmaceuticals and so many .

Out of vast list of Insulation ancillary items below are some of our product range being manufactured and supplied as

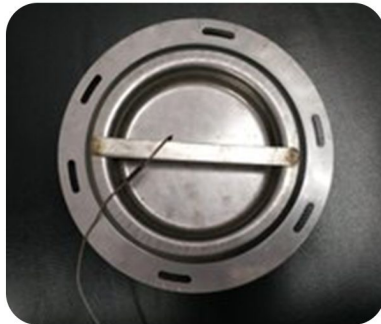

INSULATION INSPECTION PORT (SILLICON RUBBER)

Inspection Port consists of Silicon Rubber Plug with complete set (Plug + SS Lanyard + O Ring + Insert pillow + Aluminium/SS Base plate)

Inspection ports are designed to assist in Non Destructive testing and inspection of insulated piping and equipment without disturbing the insulation lay out . Pipe Surface can be assessed during inspection

INSULATION INSPECTION PORTS (STAINLESS STEEL)

Stainless Steel plug with complete set (SS plug +SS lanyard + Elastomeric base + SS base plate)

Inspection ports are designed to assist in Non Destructive testing and inspection of insulated piping and equipment without disturbing the insulation lay out . Pipe Surface can be assessed during inspection

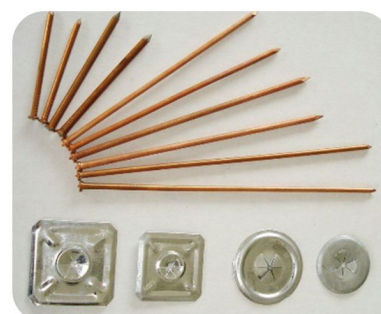

EXPANSION SPRING /BREATHER SPRING

Expansion spring 2 " & 4 " are made of AISI 302 & 304 and applied to secure expansion and contraction of small II diameter insulation system over piping, tanks, vessels and equipment which are subject to Suitable for band with a width of up to 19 mm (3/4").

TOGGLE CLIP

Toggle clips are available in various sizes and are made of SS 302 and 304 Are widely used to tighten the bands .

INSULATION PIN AND WASHER

Insulation Pins are manufactured using low carbon high quality mild steel. All steel pins are fully annealed unless otherwise specified. Self locking Washers are used to fasten wire mesh in place with pins

CERAMIC TAPE

Ceramic Fibre Tapes are made of Closely Woven Ceramic Fibre having composition of Alumina Silica Fibres free of Asbestos. Ceramic Fibre Tapes are Non-combustible when tested in accordance with BS 476 Part 4

MYLAR/MULTIPLE FOIL

Mylar Foil Tape / Water Vapour Barrier is Three Ply Laminated Product with First Layer of Polyester Second Layer of Aluminium and Third Layer of Polyester. Three Ply Laminated Foil is having excellent resistance to tear , outstanding properties to resist punctures , provide good adhesion and Fire resistance and had wide range of Temperature application

WELD MESH / WIRE NETTING / WIRE

We supply an extensive range of Welded Mesh, Perforated Sheet, and Expanded Metal in a wide range of sizes. Stainless steel welded wire mesh offers better strength & integration compared with other wire mesh products. Welded wire mesh is durable, corrosion resisting and firm in structure.

BANDS AND WING SEAL

Stainless Steel wing type seals are used to fasten steel banding on thermal and acoustical insulation system . Generally available in size of 13 mm , 16 mm & 19 mm .

FASTENERS SCREW , RIVET , POPUP RIVETS ETC

All types of fasteners are available such as flat head, hex head, slotted head, nut and bolts, blind rivet self drilling screw etc. In MS, SS or Zinc Coating.
